Aspiring Software Engineer | Passionate C++ Coder & Data
Structures (DSA) Enthusiast | Building Interactive & Responsive Web
Apps

Sikandarabad, Uttar Pradesh, India

Summary

I am an aspiring Software Developer and engineering student focused on building robust logic and interactive user interfaces. I love tackling algorithmic challenges and data structures using C++, and I actively practice problem-solving on platforms like LeetCode. Alongside core software development, I have a strong interest in front-end web engineering, where I design responsive and user-friendly web applications (like interactive tracking systems). I am a self-driven learner, passionate about exploring cloud infrastructure, and always looking for opportunities to expand my tech stack. Open to internships, technical projects, and networking with tech professionals!

Education

GL Bajaj Institute of Technology and Management
Bachelor of Technology · (September 2024 - July 2028)

Babu Bodhraj Convent School
